DESIGN HABITAT

A close-up photograph of teal-colored water with gentle, rhythmic ripples across the surface. The lighting creates soft highlights and shadows, emphasizing the fluid texture.

FLUIDITY

A close-up photograph of light-colored wood shavings or chips. The shavings are piled together, showing their fibrous texture and varying lengths. The background is a blurred, warm brown color.

SOLIDITY

A close-up photograph of several vertical wooden planks. The planks are light-colored with a visible wood grain. They are arranged in a row, creating a strong sense of verticality and structure.

LIGHTNESS

Life can be perceived in small moments—in the warmth of the sun, the gentle breeze of a late afternoon, or the fluidity of ocean waves.

SACCARO OUTDOOR
COLLECTION 2024_25

With striking colors and unique
expressiveness, designed by
La Mamba Studio, Saccaro presents:

GRAO
COLLECTION

The Grao Collection invites you on a sensory journey through Mediterranean and Asian landscapes, where each piece is a work of art.

With the strength and natural beauty of TEAK wood, known for its durability and resistance to the elements, combined with the soft and adaptable touch of nautical fabric, this collection offers unmatched comfort and timeless elegance.

A modern black sofa with a wooden frame is positioned in a minimalist room. The sofa has several black cushions and is set against a light-colored wall. The floor is a smooth, light-colored surface. The lighting is soft and even, highlighting the texture of the sofa and the wood.

TEAK wood is native to Asian forests, resistant to moisture, and offers great durability due to its natural oil content and the presence of silica in its composition.

Allow yourself to experience sublime outdoor moments with the Grao Collection, where every detail is designed to transform your outdoor spaces into environments of pure harmony.

Directly from the
tropical seas, designed
by Alain Blatchè,
Saccaro presents:

ATOL

COLLECTION

Inspired by the fascinating formation of tropical atolls, the Atol Collection is the perfect choice for those who wish to create a unique and welcoming environment.

With its modular design, these contemporary sofas offer endless combinations, allowing you to design personalized central islands that perfectly adapt to your lifestyle.

A modern, light-colored sofa with a curved backrest and armrest, positioned in a minimalist room. The sofa is the central focus, set against a warm, brown wall. To the left, a large window is covered with light-colored, vertically pleated curtains, through which soft light is visible. The floor is a dark, reflective surface that mirrors the sofa and the wall. The overall aesthetic is clean and sophisticated.

The Atol Collection is versatile
and ideal for both residential and
corporate spaces, where
sophistication meets
functionality.

Create your own possibilities and transform your space with the Atol Collection.
